PROFILE SUMMARY

- Product Designer experienced in designing end-to-end digital products across fintech, lending, investment, mobility, and community platforms.
- I specialize in translating complex business processes into intuitive user experiences across web, mobile and emerging interfaces
- Experienced in leading projects end to end, from research to launch, collaborating with cross-functional teams to deliver accessible, user-centered products that improve operational efficiency and customer engagement.

PROFESSIONAL EXPERIENCE

Product Designer (Contract)

2025 – Present

Siscom Africa

Building fintech products that make lending, investing, and financial services easier for businesses and their customers.

- Owned the complete product design process for the Belong investment platform as the sole designer, leading user research, UX strategy, interaction design, prototyping, visual design, and supporting product decisions throughout development.
- Designed the end-to-end experience for a Salary Advance Loan platform, including employee, employer, admin, and salesperson dashboards, helping employees receive salary advances 41% faster while giving employers a clear view of loan requests, approvals, repayments, and employee records.
- Created simple onboarding and KYC experiences by designing registration, identity verification, and account setup flows, making it easier for new users to access financial services.
- Worked closely with business stakeholders to understand customer needs and turn them into practical product solutions through user research, workshops, and feature planning.
- Partnered with product lead and software engineers throughout development, ensuring designs were practical to build and delivered a smooth experience for users.

Product Designer (Freelance)

Skoot

Mobility startup developing digital products for clean transportation, including on-demand gas delivery and electric vehicle leasing services.

- Owned the complete design process for two mobile applications within a one-week engagement, leading UX strategy, interaction design, prototyping, visual design, and design systems from concept to handoff.
- Designed the end-to-end experience for Skoot Gas and Skoot Ride, including onboarding, KYC verification, gas ordering, vehicle leasing, delivery tracking, digital wallets, repayments, and battery charging flows, making complex services simple to use.
- Worked closely with stakeholders to understand business goals and translate product requirements into clear user journeys, information architecture, and high-fidelity designs.
- Delivered two complete, development-ready mobile products independently within one week, helping the team move quickly from idea to implementation.

Product Design Intern

Voltax Africa

09/2025 – 12/2025

Design agency building digital products that help businesses create engaging online experiences and connect people with content more easily.

- Contributed to the redesign of the Buma Awards platform by working with a team of designers to improve the user experience, making content easier to discover and navigation more intuitive.
- Identified usability issues by conducting UX audits and reviewing the existing platform, helping the team prioritize improvements that enhanced the overall user experience.
- Improved the platform's information architecture by redesigning artist profiles, award categories, nominations, and event pages, making content easier for users to find.
- Created user flows, wireframes, prototypes, and responsive interface designs that helped communicate ideas clearly and supported design reviews with stakeholders.
- Designed reusable UI components alongside the design team, creating a more consistent interface and making future design work more efficient.
- Partnered with developers and fellow designers during implementation, helping ensure the final product matched the approved designs and delivered a seamless user experience.

UI/UX Designer (Volunteer)

Tech Sisters Kenya

2025

Community organization helping women grow careers in technology through mentorship, networking, learning opportunities, and industry partnerships.

- Helped design a community platform that supports more than 1,800 women by creating simple and accessible experiences for mentorship, networking, memberships, and partnerships.
- Designed onboarding and membership journeys that made it easier for new members to join the community and access available resources.
- Created responsive layouts and reusable interface components that provided a consistent experience across desktop and mobile devices.
- Planned user flows and information architecture that made it easier for members to find events, programmes, and community resources.
- Worked with community leaders and stakeholders to turn their goals into practical digital solutions that supported member engagement and long-term community growth.
